

LYME DISEASE ON THE NHS

CAUDWELL LYME DISEASE CHARITY

PATIENT SURVEY RESULTS 2016

Q19: PRESCRIBED MEDICATIONS

WHICH MEDICATIONS ARE YOU CURRENTLY PRESCRIBED ON THE NHS?

250 RESPONDENTS NAMED DRUGS IN ADDITION TO THOSE LISTED IN IN THE SURVEY.

Pregabalin

Amitryptilene, butran patches 5 & 10 mgs, profolactic aciclovere,

Hydrocortisone, cipramil, Tapentadol, doxycycline, tramadol, Zofran, avamist nasal spray

Fluoextine and vitamin D

Fluoxetine

Amoxicillin

propanolol

Carbimazole

Doxycycline

Clonazepam Nortriptyline

Tramadol

morphine, zoromorph, anitriptaliyn, opramyzodole, buscopan, iron, vit d , many others cannot recall names

prednisolone, vitD (Accrete with calcium)

Diclofenac, Sumatriptan, Tamazipam.

Desunin tablets-5 a day to increase Vitamin D levels

*low dose naltrexone

Nortriptyline

Omeprazole, Movicol, Naproxen

Fingolimod

iron supplements

Norithesterone for hormones

Methotrazate

Citalapram

Seroxatine

Loads as I'm in icu

Gabapentin and Amatrytiline

Doxycycline

Naproxen

Colesevalam, amitriptylene, b12 hydroxocobalamin, T₃, aciclove, r,

gabapentin, tramadol. gp said I have to buy my own vitamin D!

Norco; Synthroid

Voltorol, Dihydrocodeine, Fentanyl patches, Tegretol, Lamotrigine, Clobazam, Bricanyl Turbohalor

Co-Dydramol, oramorph, versatis plasters, Naproxen,

Amitriptyline

Amytryptaline

Aspirin (blood thinner), Statins/Crestor, Ramipril/Hypertension

T₃ and other supplements not from Nhs

Duloetine , lactaid , migralieve , rizatriptan , naproxen

duloxetine, metformin, folic acid, insulin

Salbutamol

doxy and epileptic drugs

Just been left to rot

sertraline - sensitive to prozac made suicide symptoms worse

Allergy and asthma meds dry eyes drops

Disclufenac and previously lyrica but not now

Citalapram - Warfarin - Bisoprolol

none in list no box to tick as other!

Ferrous Fumarate

Gabapentin

Dihydracodeine & codeine phosphate stopped due to causing gallbladder spasms.

Penicillin, Cefalexin, Ranitidine, Diclofenac and Melatonin

ferrous gluconate, ivabridine, microgynon to reduce iron loss

Amitriptyline

Blood pressure and water tablets

amitriptyline, vitamin D, fexofenodine, asthma inhaler, Rosex and prochlorperazine

Puffer for breathlessness

Dosulepin

Kepra, baclofen , iv treatment

Tysabri

Tysabri

Anti depressants

Candesartan

cerrezette

MIDORINE

Diazepam , tramadol, amitriptyline

Amitriptyline

Tamulosin, elleste oesrogen,

Mirtazapine for depression, liothyronine (Thyroid T₃)

Liothyronine

Mirtazapine. 45mg

Zinnat, ciprofloxacin, Diflucan, propranolol

sertraline lamotrigine midorine diazepam

MEDICATION FOR BLADDER PROBLEMS-ASTHMA INHALERS-

Mirtazapine, Duloxetine

Co-trimoxazole, Sumatriptan, Propranolol, Mefenamic acid & Zelleta

Amitriptyline , nortriptyline ,6 BP medications and now Indapamide ,7 doses of trimethoprim

Prochlorperazine. Cyclizine, citapram, omeprazole.

Gabapentin, omeprazol, diclophenic

Mefenamic Acid

Migrave for migraine attacks

Liothyronine and ivabradine

I am currently prescribed thyroxine and ursodeoxycholic acid. I stopped taking the ursodeoxycholic acid when my liver results came back normal after taking Lyme meds prescribed privately, cannabidiol and low dose Naltrexone.

Zomorph. Sertraline. Lansoprazole. Doxycycline

Diffundox XL 400mg, Lisinopril 10mg

Gabapentine

other

Sertalin statin and hrt

Antihistamines

Vsl3 and ubidecarinone

Amitriptylene, Butrans Patches.

Ibuprofen, Dulexatine, Tramadol, Valacyclovir, penicillin, Elocan, ictho paste, omeprazole, ceterazine, daktocort, Ventolin inhaler, Beclometasone,

tramadol, angina spray

amatriptalin

Liothyronine, Mirtazapine

Gabapentin, lamotrigine

Baclofen, propranolol, venlafaxine

Anti depressant

Methotrexate folic acid tramadol

Propranolol, Tramadol, Naproxen, Clonazepam, Doxycycline, Amoxicillin

Neurontin

Friday, Feb 12th 8:18AM

Tramadol, midodrine and orlanzapineFriday, Feb 12th 7:14AM

Mirtazipine. Citalopram stemetilFriday, Feb 12th 7:24AM

Naproxen omeprazole terbinafineFriday, Feb 12th 6:28AM

Naproxen omeprazole terbinafineFriday, Feb 12th 6:10AM

Doxycycline and MestinonFriday, Feb 12th 5:44AM

venavaxalineFriday, Feb 12th 5:39AM

Nortriptyline, antibioticsFriday, Feb 12th 3:01AM

TramadolFriday, Feb 12th 2:41AM

Hydroxechloriquine Thursday, Feb 11th 7:36PM

Zolpidem instead of Zopiclone. Beta histine for vertigo. HRT. Cephalexin 2g per day for the last year, for the bladder condition. Fluconazole 150 mg 1 x per week, to prevent candida. Thursday, Feb 11th 5:10PM

Amitriptyline Thursday, Feb 11th 4:52PM

Baclofen, Vicodin Thursday, Feb 11th 3:32PM

Indapomide Thursday, Feb 11th 11:21AM

HRT Thursday, Feb 11th 12:24PM

Can't remember name Thursday, Feb 11th 1:41PM

Ivabradine Thursday, Feb 11th 1:36PM

Buprenorphine patches 52.5ug/hr, plus sublingual tablets and 75ug/hr patches. Liothyronine, quinine sulphate, Hylo-care, vita-pos, Doxycycline x2 weeks and 1wk metronidazole with 6-7gap between. Thursday, Feb 11th 12:12PM

Midodrine Thursday, Feb 11th 1:15PM

Dothiepin (came off everything else that I was wrongly diagnosed with) Thursday, Feb 11th 12:03PM

Gabapentin Thursday, Feb 11th 11:21AM

Amoxicill, bar 1 baby 1, somento, oil of oregano, collidial silver, Thursday, Feb 11th 11:23AM

Serc16 for vertigo Thursday, Feb 11th 11:47AM

HRT Elleste Duet Thursday, Feb 11th 11:11AM

vitamin b12 injections, linaclotide, oxybutynin hydrochloride, circadin, pregnisilone, omeprazole, ducolax, movicol Thursday, Feb 11th 11:06AM

Aciclovir, Micronor Thursday, Feb 11th 11:05AM

OxyContin, Vicodin, conazepam, Thursday, Feb 11th 10:23AM

Cefuroxim+Azithromyzin + Rifampicin Thursday, Feb 11th 10:04AM

Omeprazole, Ibuprofen, voltarol gel Thursday, Feb 11th 9:42AM

Adavin Thursday, Feb 11th 10:06AM

Acyclovir Thursday, Feb 11th 10:05AM

Zoliphedem sleeping tablet Thursday, Feb 11th 9:30AM

Predisinole (steroids) Thursday, Feb 11th 9:38AM

anti depressant Thursday, Feb 11th 9:42AM

cymbalta Thursday, Feb 11th 9:37AM

Amitriptyline Thursday, Feb 11th 9:28AM

many supplements, artimenisin (compounding pharmacy) A Bart for Bartonella Thursday, Feb 11th 9:33AM

duloxetine for nerve pain. b12 jabs. co codamol Thursday, Feb 11th 9:22AM

Amitriptyline, fludrocortisone, atenolol, volterol suppositories and tablets, constant antibiotics for UTI, lansoprazole, fluconazole Tuesday, Feb 9th 7:22PM

Neurotic patches. Propranolol. Venlafaxine. Omeprazole. Tuesday, Feb 9th 4:38PM

doxycycline Tuesday, Feb 9th 6:00AM

Tramadol, topiramate (topamax) sertraline Monday, Feb 8th 6:00PM

Baclofen Monday, Feb 8th 3:59PM

Ovranette Monday, Feb 8th 7:09AM

Azithromycin Monday, Feb 8th 10:11AM

fludrocortisone, lymecycline Monday, Feb 8th 7:45AM

Omeprazole, diazepam, codeine Monday, Feb 8th 6:30AM

cabergoline inhalers, amitriptyline (which I no longer take as it wasn't helping nerve pain) Monday, Feb 8th 5:59AM

Lamictal, Gabapentin, Tramadol, Monday, Feb 8th 5:53AM

Ferrous fumarate for anaemia Monday, Feb 8th 5:48AM

Ferrous fumarate for anaemia Monday, Feb 8th 5:32AM

Doxycycline 1 month Monday, Feb 8th 4:12AM

Lanzoprazole & citalopram Monday, Feb 8th 4:44AM

Naproxin, Ranitidine, Asthma inhalers Monday, Feb 8th 4:00AM

Pentasa granules 2g, Asacol suppositories 500mg, Salofalk enemas 2g, fexofenadine, cetirizine, hydrocortisone, prednisolone Friday, Feb 5th 5:09AM

Doxycycline, symbicort Sunday, Feb 7th 7:51AM

Tramadol, imigran, amoxicillin, IV ceft (4 weeks) anti-inflammatories, extensive movicol, oxybutin (bladder med) progesterone Sunday, Feb 7th 6:07AM

Tramadol, Diclofenac, Nitrazepam, various antibiotics Sunday, Feb 7th 4:50AM

Seroxat Saturday, Feb 6th 1:56PM

Buprenorphine patch Saturday, Feb 6th 2:55PM

doxycycline, amitriptyline Saturday, Feb 6th 1:38PM

Amitriptyline Saturday, Feb 6th 9:53AM

Propranolol (they won't give me cocodamol anymore) Saturday, Feb 6th 8:56AM

Amitriptyline Saturday, Feb 6th 8:11AM

BP treatment/Acupan Saturday, Feb 6th 7:49AM

high blood pressure tablets Saturday, Feb 6th 7:22AM

Clonazepam, mirtazepine Saturday, Feb 6th 5:50AM

Tapentadol Saturday, Feb 6th 3:32AM

Ibuprofen Friday, Feb 5th 6:50PM

Amitriptyline Friday, Feb 5th 6:02PM

gabapentin Friday, Feb 5th 2:44PM

Amitriptyline and senna Friday, Feb 5th 3:13PM

Glimepiride Armour thyroid Friday, Feb 5th 1:45PM

Nortriptyline, Calcichew D₃ Forte, Ferrous Fumerate, Ibuprofen, Meptazinol, Omeprazole, bendrofluazide, Tramadol Friday, Feb 5th 2:54PM

Advair, Hydrocortisone, Singulair Friday, Feb 5th 2:14PM

Minocycline sepra gabatin lamictal cipro zinnat rifampin Friday, Feb 5th 1:41PM

Cefalexin, Tinidazole, Flixatide, Lansoprazole Friday, Feb 5th 9:05AM

slow salt, forceval, melatonin, ivabradine, chromyl chloride. Friday, Feb 5th 11:22AM

codydromil, citalopram, melatonin Friday, Feb 5th 1:05PM

Gabapentin Friday, Feb 5th 1:08PM

Naproxen, omeprazole Friday, Feb 5th 1:11PM

Beta blocker, anti platelet, statins Friday, Feb 5th 1:11PM

Clonazepam Friday, Feb 5th 10:17AM

Citalopram Friday, Feb 5th 12:24PM

Amitriptyline Friday, Feb 5th 12:32PM

Loratidine, ranitidine, hydroxychloroquine, Friday, Feb 5th 12:17PM

Hormone balancer (progesterone) Friday, Feb 5th 12:09PM

sertraline, propranolol Friday, Feb 5th 11:52AM

Mirtazipine Friday, Feb 5th 11:04AM

Tramadol Friday, Feb 5th 11:29AM

Zolpidem. Beta histine for vertigo. HRT post menopausal (to help bladder) Friday, Feb 5th 11:01AM

Steroid nasal spray/drops Friday, Feb 5th 10:24AM

Hydroxychloroquine Friday, Feb 5th 10:01AM

Celebrex, gabapentin, tramadol, bisoprolol, montelukast, flixonase, phenergan, multivitamins Friday, Feb 5th 10:15AM

I have been offered drugs for reflux, anti-depressants, and laxatives. Friday, Feb 5th 9:03AM

Doxycycline Friday, Feb 5th 10:16AM

Testimony, estradot, uterogeston, lansoprazole, nortriptyline Friday, Feb 5th 10:13AM

Epi pen Friday, Feb 5th 8:33AM

Iron, Antibiotics, B12 Friday, Feb 5th 7:05AM

pulsed antibiotics Friday, Feb 5th 9:43AM

Friday, Feb 5th 8:48AM

Zolpidem, zaditen, inhaler, synarel, evorel patches

Amitriptyline, Vit d, lithium, b12 (Hydroxy & methyl), boxes of needles, ventolin inhaler, liothyronine,

Zolpidem, amitriptyline, gabapentin, lamictal, VSL₃

Azytromycin and Doxycycline

Betnovate and diprocream

Pramipexole

Amoxicillin, Memantine

Gabapentin tramadol

Etodolac

Co-codamol 30/500

Zolpidem (instead of Zopiclone)

Nalcrom, Gabapentin, Tramadol.

tramadol, amitriptyline and gabapentin

Azithromycin, Doxycycline

Antidepressants

Amitriptylene, Valtrex, zantac, can have omeprazole and Certirizine as needed.

Vasicare (for Lyme related bladder problems)

Mirtazapine

Anti inflammatory

Citalopram, lansoprazole baclofen doxycycline acyclovir

Bisoprolol, Colesevelam

Fluoxetine

Amitriptylene 50mg, Fluoxetine 20mg.

Vitamin D, Iron, Flucloxacillin

Citalapram, quetiapine

Slow release ibuprofen 800 mg

Sertraline

Azithromycin, Doxycycline (both for 12 weeks) Sertraline, Omeprazole, Betahistine

Naproxen, Enbrel, hydroxychloroquine, propranolol

Buprenorphine patches, tramadol, diclofenac, amitriptyline, sumatriptan, nalcrom, tramadol

clarithromycin

mirtazepine

asthma inhalers

tramadol ramipril

Lansoprazole and sleeping tablets

Amytripelin

Buscopan. Cerevette

amitriptyline

Lisinopril

Simvastin. Bisoprolol. Bendroflumethialde. candesartan. Clopidogrel. Vitamin D

Simvastin. Bisoprolol. Bendroflumethialde. candesartan. Clopidogrel. Vitamin D

Minodrine

Ranitidine, Loratidine, Ketotifen, Symbicort inhaler, fexofenadine,

Omeprazol, doxycycline, diamox, oramorph, gabapentin

traneximic acid tablets

Carbimazole

Gabapentin, amytriptalin, mirtazipin, ritalin

Propranolol, lansoprazole,

Methotrexate, Naproxen, atenolol, lansoperazole, Loratidine, Folic acid

Pain killers don't work. I was given Valium and Prozac but they made me very much worse, so I stopped taking them. The doctor prescribed them because she thought the illness "was all in my head" and that I was "worrying myself into remaining ill". "If only I would let go of my false illness beliefs I would recover". Blame the patient. I hate the NHS and their cult-like voodoo doctors.

pain injections in theatre

I have taken medication for one condition or another for decades, all to paper over the cracks.

GP had pressurised me into taking antidepressants but I haven't taken them.

Diabetes drugs and treatments for Candida and skin rashes

Tramadol

Regular monthly blood test required when taking this medication

Doxycycline

Antidepressants

I stopped taking western medication in September 2014. I treat naturally. Alternative/holistic/herbals etc..

As Thyroxine is unsuitable for me the NHS won't prescribe anything else despite having an exemption card. I therefore have to buy my own meds from outside the UK.

They tried all sorts of painkillers and made me take antidepressants, which did nothing, no surprise as I am not depressed! Uncle and aunt are psychiatrists and were horrified the gp had made me take them

Stopped Prozac

I take Trimethoprim and Nitrofurantoin as prophylactic antibiotics for UTI control. I have Survimed feed and various supplements prescribed on the NHS, as I'm tube fed. Depo injection to control hormone related epileptic seizures

Tried various drugs for the pain including morphine, gabapentin, Tramadol, Butrans patches., and many more. 75mg Amytryptaline and Butrans patches were the only thing that helped remotely with the pain

Asthma developed at same time as Lyme

melatonin

I have had codeine in the past when first fell ill

Also had prednisone but have stopped this as whilst on Augmentin 875 x3 day for 10 days for bacterial throat infection arthritis symptoms got better

Hydrocortisone, Calcichew vit d, telfast antihistamine. Ventolin inhaler. Nasonex nasal spray. Sodium cromoglycate eye drops, diproszlic cream, aveeno, hydrocortisone cream, clotrimazole cream, doxy line 100mg antibiotic(currently get that for immune system disease not for Lyme disease although started taking it Feb to help lyme disease,)

For low Iron

Meloxicam

Amitriptyline - pain support

Omeprazole stopped due to side effects painful bloating & abdo pain.

Replaced with ranitidine

Raft forming liquid

Tramadol stopped due to side effects shortness of breath.

Congenital hypothyroidism

I have had to fight to get any treatment from the NHS, and my Consultant has not even recognized that I may still be dealing with Lyme and co-infections. He now says I have an autoimmune illness.

I've refused all anti-depressants as I'm not clinically depressed.

Five years ago they gave me further medication after being on Effexor for 25 years or more diagnosed with PTSD when my original was heart block which led to stroke-like symptoms and Bell's palsy these were dismissed at the time.

The extra medication I didn't want to take and made me worse and I came off the tablets myself as slowly as I could as the mental part was 1% off ALL THE SYMPTOMS I FELT

Until Dec 2015, I was taking 36 tablets a day for MS (none of which had any positive effect - quite the reverse). I went private as nothing was working and that was when Lyme was discovered. The NHS never tested for Lyme, but instead diagnosed me with MS in 2008.

I feel very angry at the moment to be forced to pay VAT on the high quality supplements that make a positive difference to my wellbeing and health, that I pay for myself. I don't get any financial help and little NHS help, and when I help myself with the supplements (like vit D, Cat's Claw, Garlic allicin etc) I need to pay the Govt/tax authorities too!! This is so wrong and I want to change this!

Until Dec 2015, I was taking 36 tablets a day for MS (none of which had any positive effect - quite the reverse). I went private as nothing was working and that was when Lyme was discovered. The NHS never tested for Lyme, but instead diagnosed me with MS in 2008.

for high blood pressure

I have been offered other drugs for depression, gut issues, pain but they did not suit me - just made me worse

was on Amitriptyline for pain relief for a bit but stopped as it did nothing

oral morphine, codeine phosphate, Volteral

Nap Robin.

Gp prescribed codeine, tramadol, zopiclone, temazepam, mirtazapine, phenergan when I was first ill, this resulted in a 28 day rehab stay to come off all but the mirtazapine, He really didn't know what to do to help me except prescribe narcotics, he did try to help, but was stumped.

I gave up using the NHS when they misdiagnosed me with the wrong tests and have since been unwilling to administer treatment. I use an American doctor instead

ANTIBIOTICS

To treat opportunistic infections (and by default the chronic Lyme) along with migraine treatment. Contraception to stop periods as migraines were worse around this time and bleeding incredibly heavy. Suspect migraines are caused by Lyme or consequence of untreated Lyme (and possibly co-infection like Babesia).

Having been prescribed beta-interferon, propranolol and citalopram, to no avail, I now self-treat until they come up with credible and fairly tested treatments - preferably allopathic ones.

Except I got sleeping tablets for a brief spell over the last few weeks due to a stressful issue.

Tramadol

I now have to pay for my own antibiotics as my Gp refuses to prescribe me any more.

In the last 12 months I was on neat codeine and antidepressants too. Over my illness they kept changing antidepressants and telling me I was just depressed, also was on Naltrexone and gabapantin.

Take paracetamol for headaches aches pains etc but buy them over the counter

stomach meds pain killers

I have private prescriptions from a clinic. I was only eligible for 28 days of doxycycline which I was prescribed by my GP, but failed to get rid of the infection. I was refused further treatment by the ID clinic as they don't believe in chronic Lyme.

My GP prescribed me Zinnat (recommended by my other dr in another country where I was diagnosed) for one month and also aciclovir but could not continue on Zinnat as I got a bad rash after 3 weeks on it, and as he did not know any better to help me with I started herbals to treat myself.

On instruction from IImd

Tried many others mainly antidepressants and painkillers.

Fot seizures n spasms

Ivabradine for POTS (postural orthostatic tachycardia)

Have meds for other conditions but since lyme between treatments and first days of abx need to increase asthma inhalers, antihistamine. I also have a stockinette on prescription to cover spine support, but had that before 2008 when know definitely was when Lyme arthritis appeared mildly and had several bullseye rashes, but misdiagnosed, but possible chance caught lyme after bites in 1990/1 as has large irregular bulleye coloured rashes.

They did keep trying to put me on beta blockers and st the very beginning they put me on 2 week antibiotics

I have taken Low dose naltrexone before but it was not perscribed but the NHS.

I have previously been perscribed Prozac, Valium, diazepam, tramadol, diplophenic, codine.

Buehners herbal treatment, tox ease, dandelion root, oxygen chamber, chelation therapy, spine therapy, chiropractic therapy, massage therapy, hydro clonics, zophren, phengren, and much more

Have been prescribed numerous medications from gp for migraines and vertigo. None have worked.

Inexplicable early menopause in late twenties. HRT started mid thirties.

Doxycycline - 100mg for 3 weeks

I now see doctors privately as the nhs was so bad. I go to the breakspear clinic where Lyme is recognised.

Meant to help with pain and sleep but has little effect on me.

some antibiotics

I have chronic biofilm infections in my bladder which is also misdiagnosed in the UK often as IC which I believe was caused by damage from Lyme and do infections I am constantly having other infections

I take Glandular adrenal extract as an alternative support.

Prescribed but I decided not to take it.

also on contraceptive pill cerezette

Only take the omeprazole

All they have done is try to give me anti-inflammatories and painkillers and nerve pain drugs. none of which have helped the root of the problem and on going pain and headaches.

I have to see a probate specialist as the NHS did nothing for me than fob me off and say there was nothing I could do! It took over ten weeks before I was given antibiotics even though my blood results showed Lyme.

Soon to add montelukast and sodium cromoglycate.

I don't pay for prescriptions.

Still waiting to get anticonvulsants for seizures

They won't give me cocodamol anymore as they are scared I am taking it for the wrong reasons & I am also taking beta blockers - my family give me their cocodamol to help with the pains and artheritis.

I buy Naltrexone privately since it was prescribed by a private specialist GP.

My NHS GP said GPs have to have to have special permission to prescribe under very limited circumstances.

allergic to morphine and opium based painkillers: so prescribed Acupan for severe joint pain

I spend about £800 a month to treat myself, with abx and supplements. IMy artrhitis apain Lyme is going much ebetter

Bowel medications

Liothyronine, Zomig 2.5mg & 5mg (Zolmitriptan), Ferrous Fumarate.

Also, due to many other symptoms: fibogel sachets, pessaries for haemorrhoids, steroid cream for autoimmune skin condition and a wash/lotion.

Funding taken away by CCG for Armour thyroid after 13 years. Lyme disease symptoms exacerbated by levothyroxine; ID & endocrine consultants plus GP appealed to CCG for funding without success

Been on Efexor, zopiclone, pregabalin, Gabapentin, Citalopram in the past

Lucky to get these meds!!!

Most of the GPs I've seen over the years have been unhelpful, but my current GP wants to help as much as he can.

Dr Jemsek (LLMD in the USA) originally prescribed these for me in 2009 for seizures and my GP in the UK does prescribe these for me now but that is the only help I get from the NHS.

my joint pain is very bad, i ear taking pain killers, as i know it will get worse, i go as long as i can withot them because if i got dependant upon them i would need the hardest of drugs in a few years time, i do not want to become a pain kller zombie,

i do all the things i can, i drink lots of lemon water, drink green tea, i hae coconut oil for candina, and epon salt baths, i do all the natural none medication things i can to help myself,

I avoid painkillers unless in exceptional circumstances. They treat a symptom not the cause of the symptom.

For sleep and eating.

Only because I managed to get to a tertiary level urologist am I being prescribed antibiotics, the consultant believes in biofilms (but not Lyme disease) so he knows that there are chronic infections whi require long-term antibiotics.

I've had beta blockers amitriptyline anti viral drug. Used to treat cold sores. Lansoprazole naproxen

The above is for flying phobia. Have also had topical acne medications and nausea medications but not treatment for the Lyme Disease!

Was on 32 medications upto Jan 2015 (5 years) most high dose effecting my liver & kidneys so I decided to come off them all without medical advice only on pain meds that don't work on me now I'm anaphylactic to NSAIDS & opiates hardly work and have bad side effects in chronic pain daily

I was refused antibiotics, sativex, low dose immunotherapy

I was on Prozac for 7 years, but it made me more ill. I now have severe nerve damage causing incontinence. So I need lots of methyl b12 & Hydroxy b12 (as Cyano made me very ill) & as I do not methylate well, I need a mix of the 2 types. I was b12 deficient for 15 years before b12 treatment, as the NHS test is inaccurate & test serum b12 & not active b12.

Private medications:

Cefuroxime

Minocycline

Flagyl/Tinizadole

Malarone

Septra DS/Bactrim

I had this abs prescribed after Lyme specialist wrote letter to GP stated that even after 3 months of doxy which I bought myself because I only was given 2 weeks course - I still needed another treatment.

Low dose naltrexone

Eltroxin

for arthritis pain from damage subsequent to Lyme Disease

Beta histine, for vertigo

Cephalexin plus methenamine for a whole year so far, for the interstitial cystitis/chronic bladder infection.

Post menopausal HRT for the last 3 months (as a kind act from my GP when I'd asked him if it might help with bladder problems. There is no evidence that it helps - but hey, it has helped :)

Asked for Low dose naltrexone but refused.

This is the 7th different antidepressant I have been on. This, and none of the previous ones have had any effect whatsoever.

I was put of fluoxetine for 4 years, took myself off it in 2012

Bisoprolol (beta blocker) for arrhythmic problems, Colesevelam for bile pooling.

The flucloxacillin is for an infection - not for treatment of Lyme.

To manage ongoing Lyme arthritis.
