

Lyme Disease UK

School Trip Risk Assessment Checklist

Please complete this checklist before each school excursion:

(All bold words are hyperlinks. Click to be taken to relevant information)

Is the postcode of your location in an 'at risk' zone?:

Check the live **Tick Risk Map**

Ensure all adults on the trip read the **prevention** and **removal** information on the Lyme Disease UK website

If the children will be outdoors ask the parents to:

- pack appropriate **insect repellent**
- ensure their child wears long sleeves and trousers tucked into socks (fun socks optional!)
- do a thorough tick check when home and shower

Ensure at least one tick remover tool is available in the first aid kit

Whilst out encourage children to tell an adult immediately if they spot a tick. If a child does get bitten ensure the tick is removed using the **correct technique** as soon as possible
