

Dear Practice Manager

The RCGP has recently launched a Spotlight project on Lyme disease - the most common vector-borne disease in the northern hemisphere.

The project is aimed at raising the profile of Lyme disease in Primary Care - in line with one of the recent NICE guideline recommendations.

Perhaps the doctors in your practice would be interested to know that there is a free RCGP workshop on Monday Nov 12th In Birmingham.

" Lyme disease, PoTS, syncope and Inflammatory Bowel disease - easily missed conditions "
